

## case study

---

### GroupNexus

#### The Client

GroupNexus brings together industry leading talent, technology and expertise in the parking sector, to deliver pioneering products that benefit both clients and motorists.

Following the successful acquisition of Ranger Services by CP Plus in 2015, the companies have merged to create GroupNexus, managing over 1,200 sites across the UK, serving both the private and public sector, including Healthcare, Retail, Education and Transport.

#### The Challenge

Following the merging of the two companies in 2015, GroupNexus decided it was time to relocate to a bigger premises to help create a dynamic and hi-tech environment that would support the company's growth, and allow their employees and clients to thrive. They chose the iconic Grade II listed Jack Straws building, in Hampstead, north-west London, to create their new and agile workspace.

## The Project

Your Workspace installed bespoke locker units with the Burg Combipad in chrome, a high-quality electronic combination slam-latch lock, throughout the building. To help create the collaborative and innovative space GroupNexus wanted, we also installed our Storage Wall product, a highly adaptable and modular system that can be easily reconfigured to suit the confines of any space. Due to the nature of the building, other bespoke storage designs were also integrated seamlessly into small alcoves and unique spaces throughout the building to utilise all available space and bring flexibility to each working environment.

## The Look

GroupNexus chose a neutral colour for their project, Egger Fjord Green, a light green shade with grey tones to create a reserved and classic finish. Black laminate decals with lettering and number sequences were overlaid on to each locker unit, which provided a perfect contrast against the background of the locker.

## The Outcome

The introduction to the various storage products over the two floors further supports the company's transition to a more agile and dynamic way of working. The lockers and other storage units help to keep the office clear and clutter free, whilst providing staff with a secure and safe facility to keep both personal and professional belongings.

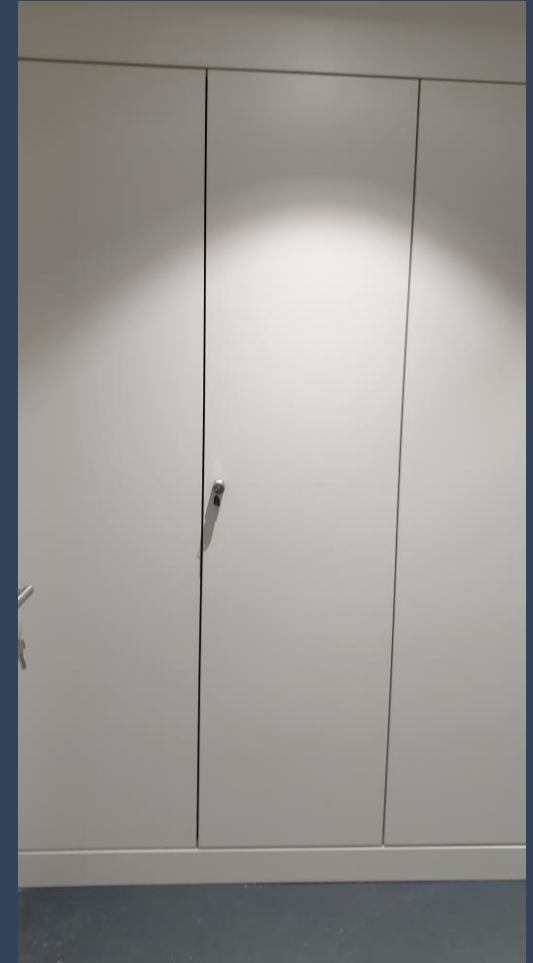

## Quote

"We had a clear vision of the kind of office we wanted to create, which would meet the needs and demands of our business, our people and our clients. We embarked on a mission to build a state-of-the-art hi-tech office space within an iconic building in Hampstead, a hub that would stimulate the collaboration and innovation that we need to help us continue to thrive and grow. We were very specific about the partners that we engaged with, in order to help us both design and implement every aspect of the build, and Your Workspace were one of those partners that delivered and exceeded our expectations."

**Elli Morris, Director, GroupNexus**
