The **future** of the workspace is **smart.**

Maximise productivity, improve workplace efficiency and provide modern convenience using our innovative smart workspace solutions.

A **smart** workspace for every stakeholder.

For the facility manager.

Gather real-time and historical insights on the usage of your workspaces and improve your overall office efficiency.

Use the data to make fact-based business decisions and optimise your office set up. Save money on cleaning, rental costs and reduce your carbon footprint, all whilst improving the overall employee experience.

For the end-user.

The Workcharge Puk interacts with your employees in various ways. When a workspace is in use, the LED ring of the smart puk will blink **GREEN**, providing a subtle vitality nudge when it's time for a little exercise. **ORANGE** means the workspace is blocked or occupied, and **BLUE** means the desk has been used, so needs cleaning.

For added convenience, employees can also wirelessly charge their devices. No more battery stress or carrying bulky adaptors.

Where the **smart** workspace meets employee experience.

Unlock the power of **data driven** productivity.

The dashboard.

Real-time and historical analytics.

The Workcharge & desk management dashboard provides valuable insights on the real-time and historical occupancy of your workspace.

Use the data to optimise your workplace layout, adding additional workspaces that are in high demand and reducing those that are used less often.

Use data to plan efficient use of workspaces, that include:

- Desks
- Booths
- Collaboration based workstations
- Focus based workstations

The results: fact-based decision making, more productive work days for your employees, improved workplace experience, carbon footprint reduction and cost savings.

The benefits for the **workplace.**

Reduce your carbon footprint

Boost your sustainability credentials, reduce your carbon footprint and reduce cleaning costs by managing your workspaces more efficiently.

Optimise your office occupancy

Learn, anticipate and optimise how employees utilise your workspace with real-time available stats, graphs and analytics.

Attractive and wireless

Say goodbye to messy wires and adaptors. The Your Workcharge Puk seamlessly fits into desks and collaborative workspaces.

The benefits for the **employees.**

Effortlessly charge devices

Stress-free charging on the workspace by simply placing your devices directly onto the Your Workcharge Puk.

Save time and maximise productivity

No more searching for available desk space or workspaces using the colour signals to indicate free, booked or used spaces.

Appealing and futuristic aesthetics

The wireless, sleek look of the Your Workcharge Puk creates an appealing and futuristic look to the modern workplace.

Blue means 'cleaning'

"I've had a busy day, so I am ready to be cleaned".

Blinking

"Time to take a little break? Re-energise and switch up your stance".

Orange means 'booked'

"I am already booked".

*This is an add-on feature to your desk booking system, if applicable.

Hassle-free **integration**
with existing IT systems.

Easily transition to a **smarter** way of working.

Workplace upgrades **without barriers**

One of the biggest challenges in building upgrades is the integration with IT systems.

With the Your WorkCharge Desk Management System, a workplace upgrade is hassle-free, without the need to integrate with existing IT systems or Wi-Fi.

This innovative system streamlines the entire upgrade procedure, ensuring a smooth transition without the usual complications.

Auto Connect via NB-IOT

Seamlessly integrate your current workspace into our system with ease.

No Wi-Fi Integration

A straight forward approach to upgrading your workspace without any issues.

Upgrade Existing Desks

Effortlessly transform your existing desks with our user friendly solutions.
